About

I'm **Chakali Ravindra**, a passionate **Frontend Developer** at Stackly Software and an **MBA student** specialising in Finance and Marketing at Sri Balaji PG College, Anantapur. I thrive at the intersection of **technology and finance** — building clean, user-friendly web interfaces while simultaneously deepening my understanding of business and capital markets.

My journey from a B.Com (Computers) background into both software development and management studies reflects my belief that the most impactful professionals are those who understand both the technical and business sides of an organisation. I'm eager to grow, collaborate, and contribute to forward-thinking teams.

Experience

Frontend Developer

Stackly Software

Sep 2025 – Present · 1 Year · Full-time

Building responsive and interactive web interfaces using modern frontend technologies. Contributing to UI/UX improvements, component development, and performance optimisation. Collaborating with cross-functional teams to deliver high-quality digital products.
